Distek, Inc. Launches Certified Pre-Owned Dissolution Equipment Program

North Brunswick, NJ – Distek, Inc., an industry leader in dissolution testing products and validation services, is pleased to announce the formation of a first to market Certified Pre-Owned Program to include the complete line of Distek instruments. Distek will recondition and certify their equipment to meet and exceed current performance standards. Certified pre-owned equipment will be sold exclusively via their internet sales department in order to maintain the cost savings customers in the used equipment market desire.

For over 35 years, Distek has specialized in designing, manufacturing, and selling new dissolution instruments. A testament to their success is the extensive life-span of their equipment. Due to laboratory mergers and closures, many of these units are purchased by companies that specialize in the re-sale of used analytical and life science instruments. Without access to original manufacturer's parts and repair techniques these used instruments are often sold in "as is" condition; ultimately leading to the consumer contracting Distek for the proper parts and service to obtain proper operational condition.

Now customers can purchase used Distek equipment with certainty through Distek's Certified Pre-Owned Program. Every customer is guaranteed an out of the box functional and certified instrument conforming to Distek's standards and passing a multi-point inspection process. Each unit is also accompanied by a standard Distek-backed warranty.

"With a segment of the dissolution market seeking out used Distek instruments, we felt it was a good opportunity to offer a reliable option to customers lacking the capital to purchase new instruments," says Jeff Seely, Global Sales and Marketing Manager, Distek, Inc. "Now customers in the market for pre-owned instruments will have the confidence in knowing that Distek will stand behind their purchase."

For further information on the Certified Pre-Owned Program or any of Distek's industry leading dissolution products and validation services contact your local representative, Distek's Headquarters at T:+1 732 422 7585, E: info@distekinc.com or visit www.distekinc.com.
