Distek, Inc. Designs Drawer Organizer for Serialized Dissolution Accessories

North Brunswick, NJ – Distek, Inc., an industry leader in dissolution testing products and validation services, is pleased to introduce a drawer organizer for Apparatus 1 and 2 Dissolution accessories. Designed by Distek, the drawer organizer is ideal for the control and tracking of serialized accessories within your laboratory.

The drawer organizer has individual compartments for compliant baskets, basket adapters and paddle blades. Each item can be grouped by position number (1-8) with a location for individual labels to record each accessory's unique serial number. Each organizer can also be labeled according to the serial or asset number of the dissolution unit associated with the accessories.

"In response to the dissolution industry trending towards the serialization of accessories Distek developed the drawer organizer to help our customers better organize their laboratory," says Jeff Seely, Global Sales and Marketing Manager, Distek, Inc. "The importance of tracking each accessory, to ensure repeated installation into the same position on the same dissolution unit, cannot be understated or taken for granted."

For more information on this or any of Distek's industry leading dissolution products and validation services contact your local representative, Distek's Headquarters at T:+1 732 422 7585, E: info@distekinc.com or visit www.distekinc.com.
